7770 Pardee Lane, 2nd Floor • Oakland, CA 94621-1424 Office (510) 746-SFEI (7334) • Fax (510) 746-7300

RMP Contaminant Fate Work Group Meeting

June 7, 2010 10:00AM – 4:30PM SFEI First Floor Conference Room Lunch will be provided

Draft Agenda

Overview of the agenda and the goals for the meeting. 2. RMP Planning Update Overview of latest status of Program priorities. 3. Mercury Strategy – Completion of the Mercury Isotope Study (Attachment) Results from the isotope study are all in and will be discussed. The plan for review of products and completion of the study will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.	1.	Introductions and Review of Agenda	10:00
2. RMP Planning Update Overview of latest status of Program priorities. 3. Mercury Strategy – Completion of the Mercury Isotope Study (Attachment) Results from the isotope study are all in and will be discussed. The plan for review of products and completion of the study will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.	1.		1
Overview of latest status of Program priorities. Jay Davis Mercury Strategy – Completion of the Mercury Isotope Study (Attachment) Results from the isotope study are all in and will be discussed. The plan for review of products and completion of the study will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.	2		
 Mercury Strategy – Completion of the Mercury Isotope Study (Attachment) Results from the isotope study are all in and will be discussed. The plan for review of products and completion of the study will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided. 	4.		
(Attachment) Results from the isotope study are all in and will be discussed. The plan for review of products and completion of the study will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 12:00 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.			•
Results from the isotope study are all in and will be discussed. The plan for review of products and completion of the study will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.	3.		
The plan for review of products and completion of the study will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.			Joel Blum
be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 12:00 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		± *	
Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		1 1	
Clarity on work proposed for 2011. 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 12:00 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.			
 4. Mercury Strategy – Completion of the DGT Study (Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 12:00 5. Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided. 			
(Attachment) A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 12:00 Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		Clarity on work proposed for 2011.	
A draft report on the DGT study is available and will be discussed. A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) 12:00 Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.	4.	Mercury Strategy – Completion of the DGT Study	11:40
A proposal for additional work will be presented. Desired Outcome: Feedback on progress, results, and plans. Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		(Attachment)	Holger
Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		A draft report on the DGT study is available and will be discussed.	Hintelman
Clarity on work proposed for 2011. LUNCH BREAK (15 min in middle of Item 4) Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		A proposal for additional work will be presented.	
 LUNCH BREAK (15 min in middle of Item 4) Closure on Coring A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided. 		Desired Outcome: Feedback on progress, results, and plans.	
 Closure on Coring		Clarity on work proposed for 2011.	
A draft report was distributed for review. Responses to comments and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		LUNCH BREAK (15 min in middle of Item 4)	12:00
and the plan for finishing the report will be discussed. Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.	5.	Closure on Coring	1:00
Desired Outcome: Feedback on interpretations, facilitate review of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		A draft report was distributed for review. Responses to comments	Don Yee
of the draft report. 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		and the plan for finishing the report will be discussed.	
 6. Modeling Strategy – Margins Conceptual Model (Handout: Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided. 		Desired Outcome: Feedback on interpretations, facilitate review	
Outline) This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		of the draft report.	
This \$40K task from 2009 is behind schedule. A detailed outline of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.	6.	Modeling Strategy – Margins Conceptual Model (Handout:	1:20
of the report will be presented. Desired Outcome: Obtain feedback on MCM outline. 7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided.		Outline)	John Oram
 Desired Outcome: Obtain feedback on MCM outline. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided. 		This \$40K task from 2009 is behind schedule. A detailed outline	
7. Modeling Strategy – Progress on South Bay Hydrodynamics Model An update on this \$100K task for 2010 will be provided. 2:00 John Oram		of the report will be presented.	
Model An update on this \$100K task for 2010 will be provided. John Oram		Desired Outcome: Obtain feedback on MCM outline.	
An update on this \$100K task for 2010 will be provided.	7.	Modeling Strategy – Progress on South Bay Hydrodynamics	2:00
		Model	John Oram
		An update on this \$100K task for 2010 will be provided.	
		Desired Outcome: Keep workgroup apprised, obtain feedback.	

8.	Modeling Strategy – Funding Recommendation for 2011	2:30
	At the last meeting, the CFWG recommended requesting a funding	John Oram
	allocation for 2011, rather than specifying tasks for next steps	
	before the 2010 work is nearing completion. The specific amount	
	to be requested needs to be determined.	
	Desired Outcome: Obtain recommendation from CFWG on an	
	appropriate level of funding for work in 2011.	
9.	Atmospheric Deposition Strategy	3:00
	Progress report on the development of this Strategy and plans for	Don Yee
	completion. Consider synthesis task for 2011.	
	Desired Outcome: Keep workgroup apprised, obtain feedback.	
10.	Closed Session: Recommendations for Pilot and Special	3:30
	Studies for 2011	Jay Davis
	Stakeholders and science advisors to develop joint	
	recommendation on studies to include in the 2011 RMP.	
	Candidate studies include:	
	1. DGTs	
	2. Isotopes	
	3. 3D Model Development Allocation	
	4. Atmospheric Deposition Synthesis	
	Desired Outcome: Categorize each proposal as strongly	
	recommended, recommended, or not recommended.	
	Adjourn	4:30
