MEMORANDUM

To: Technical Review Committee

From: Meg Sedlak

Re: Summary of Annual Meeting Survey Results – Discussion Topics to be Considered for Next Year

Particular Research Concerns/Additional Topics for the RMP to Undertake:

- Continued research on mercury and methylmercury
- Impact of Stormwater on urban creeks, loadings from tributaries to the Bay
- Investigate emerging pollutants such as phthalates, pyrethroids, pharmaceuticals, PFOS, and PBDEs
- More information on biological effects and human health impacts
- Examine Bay productivity, zooplankton, and invasive species
- Food was good; food was better at LHS; need a low carb lunch option.
