RMP Technical Review Committee Meeting

March 27th, 2007 San Francisco Estuary Institute Second Floor Conference Room 7770 Pardee Lane, Oakland 10:00am-3:00pm

Lunch will be provided. We will take a short break and then keep working through lunch.

DRAFT AGENDA

1.	Introductions and Approval of Agenda and Minutes (Attachment)	10:00
		Chair
2.	Information: Steering Committee Report (Attachment)	10:10
		Meg Sedlak
3.	Action: Decision on Redesign of Status and Trends Program	10:20
	(Attachments/Handouts)	Meg Sedlak, Jay
	A table summarizing the Status and Trends elements (existing and new)	Davis, and
	was presented at the November Redesign meeting. The TRC will need to	Group
	prioritize the list of existing and new components and decide on the	
	elements to include. The discussion will include:	
	A brief summary of the seasonality meeting:	
	A presentation on the rationale for including bird egg monitoring;	
	and	
	• An update on the organic analyte frequency. At the December TRC	
	meeting, a recommendation was made for reducing the frequency	
	of PCB, pesticide and PAH analyses to once every two years. This	
	frequency was discussed with the Regional Board and approved. A revised table will be presented.	
	Tevised table will be presented.	
	Desired Outcome: Redesigned program for Status and Trends to be	
	implemented in 2008	
	BREAK	12:30

SFEI Page 1

 Action: UCSC Special Study for 2007 (Handout) In 2007, the Status and Trends program will conduct an intercalible exercise with UCSC and Brooks Rand Laboratories. Brooks Rand conduct analysis of all stations; UCSC will conduct duplicate anal approximately one third of stations. In addition to conducting the analyses at a third of the sites, UCSC will conduct a focused study mercury in the Bay. The SC has approved the concept of an intercalibration exercise with the two labs and a special study by I however, the SC has requested that TRC review and approve the s proposed by UCSC. Desired outcome: Approval of the UCSC study Action: Use of Contingency Funds for Invasive Oysters (Attac Andy Cohen has identified an invasive oyster in the southern portion San Francisco Bay that may have been introduced by the RMP. R contingency funds are requested to remove the oyster and to deter source of the invasion.	1.10 D W
exercise with UCSC and Brooks Rand Laboratories. Brooks Rand conduct analysis of all stations; UCSC will conduct duplicate anal approximately one third of stations. In addition to conducting the analyses at a third of the sites, UCSC will conduct a focused study mercury in the Bay. The SC has approved the concept of an intercalibration exercise with the two labs and a special study by U however, the SC has requested that TRC review and approve the s proposed by UCSC. Desired outcome: Approval of the UCSC study 5. Action: Use of Contingency Funds for Invasive Oysters (Attac Andy Cohen has identified an invasive oyster in the southern portical San Francisco Bay that may have been introduced by the RMP. Recontingency funds are requested to remove the oyster and to detensource of the invasion. Desired Outcome: Decision on whether to spend \$30,000 of RM on eradicating the oyster. 6. Information: Setting Priorities for 2008 Program Plan: Prelim Discussion (Handout) The annual process for considering new Pilot and Special Studies underway. Some study ideas are in hand already. The RMP Worl are all meeting between now and June to generate and prioritize in the June TRC meeting, all of the ideas will be discussed. Desired Outcome: Discuss study concepts and identify methods soliciting additional ideas. 7. Information: Water Quality Index (Attachment) Bruce Thompson and colleagues have developed a water quality in the Bay. Desire Outcome: Input on the methodology used 8. Information: Pulse and Annual Meeting Update (Attachment) An update on the status of the Pulse will be given. Preliminary disof the agenda for the Annual Meeting. 9. Action: Academia and the RMP (Attachment) The SC committee agreed with the TRC on the importance of academia of the Annual Meeting. 9.
